-

This is a test document to verify the conversion process.

Features to Test

This document tests the following features:

1. **Headers** - Multiple levels
2. **Bold and italic** text formatting
3. **Code blocks** with syntax highlighting
4. **Mermaid diagrams** - Auto-rendered
5. **Images** - If you have any

6. **Lists** - Ordered and unordered

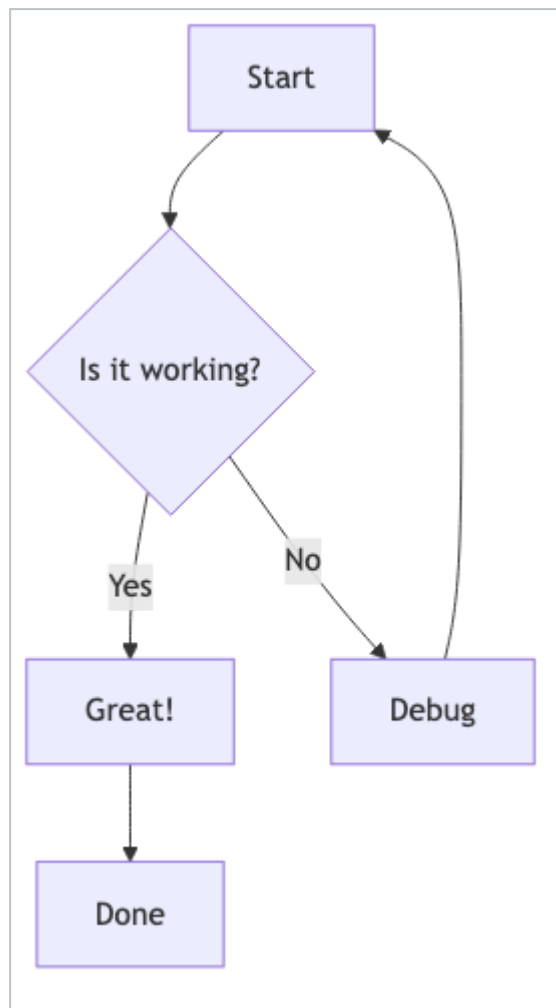

7. **Links** - Internal and external

Code Example

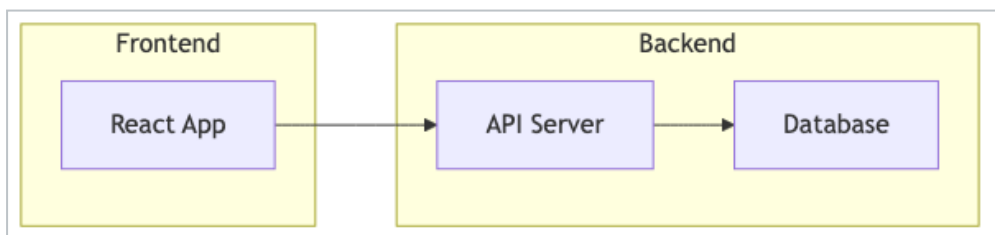

Here's a simple TypeScript function:

```
function greet(name: string): string {  
    return `Hello, ${name}!`;  
}  
  
console.log(greet("World"));
```

Mermaid Diagram

System Architecture

Lists

Unordered List

- First item
- Second item
 - Nested item
 - Another nested
- Third item

Ordered List

1. Step one
2. Step two
3. Step three

Links

- [Google](#)
- [GitHub](#)

Inline Code

Use the `convert.sh` script with `--toc` flag for table of contents.

Blockquote

This is a quote to test blockquote formatting. It can span multiple lines.

Conclusion

If you can see this document properly formatted as a PDF with:

-  Proper headers and styling
-  Rendered mermaid diagrams
-  Syntax-highlighted code
-  All text formatting

Then the conversion is working correctly!
